

The system

S.O.S. vita is an **innovating service that lets you record your medical information on the Internet**. The high level of the system technology enables you to create your personal case history with all the **medical information, including photos, x-ray and medical certificates**.

An help function guides you in the specification of any pathologies, traumas, allergies, cures and therapies, surgeries, vaccinations; besides, you may either upload **all your digital files** on the system or send your papery **via mail** to S.O.S. vita technical staff who **will digitalize it and put it in your personal profile**.

S.O.S. vita has a **record keeping feature** with which you may manage the results of the most common medical exams to compare them in the course of time through a user-friendly interface.

S.O.S. vita grants you the access to your **personal page** through an **ID number** and a **password** that you may choose during the activation process; to ensure top security and privacy the system gives you a **PIN** to add, change and eliminate your medical data.

In case of emergency

S.O.S. vita has enabled the **820 Italian hospitals** that have an emergency room to use the service, giving them an ID number and a password with which they may view **the medical information** of the person they're taking care of.

In case you were unconscious, the hospital should only enter your ID (present on you card) to view your data.

At the same time medical personnel may send just with a click **SMS and e-mail messages** automatically to the **3 relatives** you have chosen during the activation process, informing them that you have been aided, where and when.

Abroad

S.O.S. vita takes care of you all **over the world**.

Your medical case history is translated in **9 languages** (Italian, English, French, German, Spanish, Russian, Chinese, Japanese, Arab) and it lets medical personnel of every country view your information in their own language.

To access your personal page abroad doctors may just use your ID and password; thus, we suggest to write them down and take them with you every time you go abroad.

To help you in this eventuality S.O.S. vita has prepared 9-language translated **emergency cards** that explain the service and on which we suggest to write your access codes.

Check up Area

S.O.S. vita has a record keeping feature with which you may manage the **results of the most common medical exams** to compare them in the course of time.

A user-friendly interface helps you to identify the right place where to put your data and it allows you to **check up your health in real time**.

The check-up is displayed through the image of a human body divided in systems and apparatus (endocrine-metabolic, gastrointestinal, circulatory, etc.) in order to facilitate immediate and easy surfing.

You may **interact** with the system **every day**, or any time you want to update your data, and keep a **history of your health**, through tables and graphs.

Data protection

S.O.S. vita has obtained a specific permit by the Privacy Authority to process personal data. Thanks to the high level of its hardware and software framework security is able to grant absolute privacy of your information and best protection against attempts of intrusion.

Card

You may request the **personal card** (credit card size) where your name, ID number and S.O.S. vita ways of contact are written on. The card could help your **identification** as a S.O.S. vita user, making the service useful even in the case you were unconscious.
